Exploring Climate Solutions Webinar Series

Brought to you by the Governor's Council on Climate Change (GC3)

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **December 11th noon webinar**, participants will learn about the recently released report entitled "Connecticut's Clean Energy Future: Climate Goals and Employment Benefits." Building on a national report, the Connecticut study suggested that the state could reach its formal goal of reducing GHG emissions 80 percent below 2001 levels by 2050 while achieving a net increase in jobs and strengthen the economy as a whole. In this webinar, Dr. Frank Ackerman, the lead economist for the study, will provide an overview of the findings of the report.

Please join us to learn more about this innovative initiative by registering [here](#).
